

KING-GAGE Marine Systems at Workboat 2016 in New Orleans

Get [FREE Registration](#) * and come see our latest offerings for tank level and draft monitoring for the maritime and offshore industries. KING-GAGE Marine Tank Level Systems are widely used throughout the marine industry including offshore oil/gas, passenger ferries, cargo vessels, floating drydocks, and USN service. Our exhibit features the KING-GAGE LP3 Display System in addition to our extremely rugged type-approved D/P LiquiSeal Purge Control level transmitters and LevelWAV radar level transmitters.

Come talk with us about your latest project. We can make sure your vessel management requirements are fully met while delivering cost-effective and reliable systems. That's the reason operators worldwide depend upon KING-GAGE systems.
